

Change Orders

Change Orders

The Change Order module allows for improved efficiency and flexibility for your locations' change ordering process while enhancing headquarter's control and oversight.

What?

What is the Change Order module?

- A web-based change ordering module that allows for the creating, tracking, managing and analyzing of all ordering activity across all locations
- Provides for the creation of new and/or recurring orders that can be customized by the user up and until your bank's deadline
- Tracks orders from creation to delivery integrating bank and carrier data to ensure visibility throughout the life cycle of the transaction
- Optimizes the ordering process via reporting and analytical tools

How?

How does it work?

- Headquarters establishes rules: acceptable denominations, order quantities, maximum order amounts and other key requirements.
- Users create or edit change order transactions
- System places order for each customer location
- Bank fulfills the order
- Change Orders transported to location
- DTS Connex captures and records all steps in the chain of custody
