

# Change Orders

## Change Orders

The Change Order module allows for improved efficiency and flexibility for your locations' change ordering process while enhancing headquarter's control and oversight.

## What?

### What is the Change Order module?

- A web-based change ordering module that allows for the creating, tracking, managing and analyzing of all ordering activity across all locations
- Provides for the creation of new and/or recurring orders that can be customized by the user up and until your bank's deadline
- Tracks orders from creation to delivery integrating bank and carrier data to ensure visibility throughout the life cycle of the transaction
- Optimizes the ordering process via reporting and analytical tools

## How?

### How does it work?

- Headquarters establishes rules: acceptable denominations, order quantities, maximum order amounts and other key requirements.
- Users create or edit change order transactions
- System places order for each customer location
- Bank fulfills the order
- Change Orders transported to location
- DTS Connex captures and records all steps in the chain of custody

## Why?

### Why DTS Connex?

- Faster than manual orders
- Enhances visibility and transparency to all pending, current and historical activity
- Eliminates duplicate orders
- Standardizes user interface across all bank partners
- Reduces excess ordering
- Leverages unique transaction numbers to simplify reconciliation process
- Integrates seamlessly with other DTS Connex modules
