

Supply Orders

The Supply Order module simplifies and streamlines the supply ordering process by making it easy to place, track and manage supply orders.

What?

What is the Supply Order module?

- A web-based supply ordering module that makes it simple to place, track, manage and analyze supply orders at all locations
- Integrates with approved cash room supply vendors and company-owned distribution centers
- Allows for centralized supply management and decentralized ordering
- Analyzes supply orders using intelligent reports detailing expedited orders, frequently ordered products, products not ordered and much more

How?

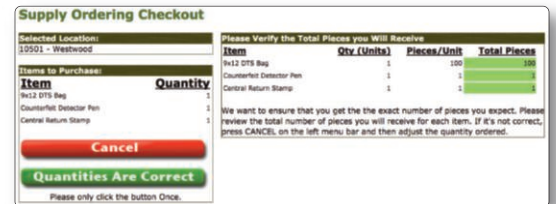

How does it work?

- Headquarters establishes rules: available cash room products, order quantities, expedited shipping options and other key requirements
- Users place supply orders
- System communicates supply order information to approved vendors and/or company distribution centers
- Vendors communicate supply order confirmation and tracking information back to DTS Connex
- Locations receive their supply orders
- Headquarters can track, manage and analyze supply order activities at all locations

Why?

Why DTS Connex?

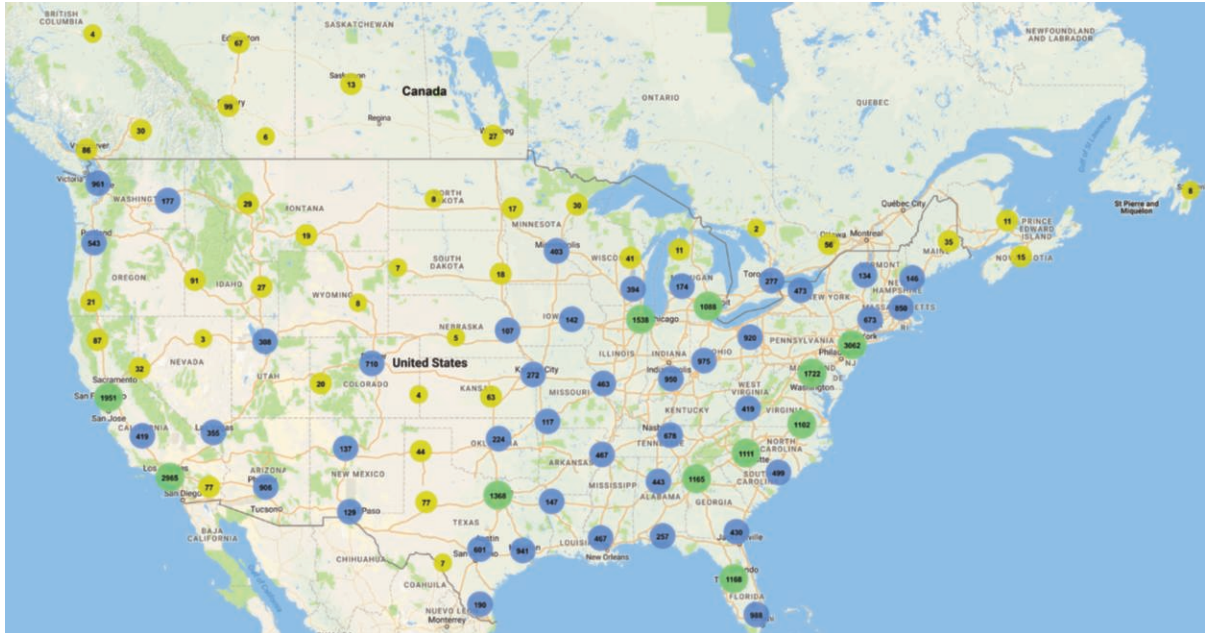

- Standardizes and streamlines the supply order process at all locations
- Reduces the time required to place and manage supply orders
- Saves money by allowing locations to order only approved cash room supplies
- Optimizes order quantities to reduce delivery cost
- Controls expedited shipping expenses
- Provides order tracking capability
- Integrates seamlessly with other DTS Connex modules
